Today we discuss the oil of the Charger. Let's start with a quick answer: For all Dodge Chargers produced between 2005 - Present-day with a 2.7L, 3.6L, or 5.7L engine, API-certified recommended engine oils include: Mopar MaxPro SAE 5W-20, Pennzoil Ultra Platinum 5W-20 and, Shell Helix Ultra 5W-20. For the 2005 - 2010 Charger with 3.5L engine, API-certified recommended engine oils include: Pennzoil SAE 10W-30 and Shell Conventional 10W-30. For Dodge Hellcats with a 6.4L engine Dodge recommends synthetic API-certified engine oils such as Pennzoil Ultra Platinum SAE 0W-40 or Mobil 1 SAE 0W-40. However, that doesn't answer the question fully. Each generation has its own specific needs and limitations. Furthermore, you also need to know the weight of the oil, the capacity, how to check the engine oil level, and how to refill it. We'll discuss all of this in this blog, so read on! Also read: What Gas Does A Dodge Charger Take? What's The Oil Weight Of A Dodge Charger? For the 2.7L, 3.6L, and 5.7L Dodge Chargers produced between 2005 - Present-day, Dodge recommends an oil viscosity of 5W-20 SAE. For the 2010 - 2015, 3.6L Charger 5W-30 may also be used when 5W-20 is not available. For the 2005 - 2010, Charger engine oils with a viscosity of 10W-30 SAE must be used. These recommendations include use in all temperatures. For the 6.4L Hellcat Dodge recommends an oil viscosity of 0W-40. If you're interested in buying new engine oil for your Dodge Charger we've made a clear overview for you below. All these links will refer you to Amazon where you can buy the selected engine oils: 2.7L, 3.6L, or 5.7L engine: [click here](#) for Mopar MaxPro SAE 5W-203.5L engine: [click here](#) for Pennzoil SAE 10W-306.4L engine: [click here](#) for Mobil 1 SAE 0W-40 Talking about weight, in one of our earlier blog posts we wrote about the weight of a 2006 - 2021 Dodge Charger! What's The Oil Capacity Of A Dodge Charger? The 2.7L, 3.5L, and 3.6L Dodge Chargers manufactured from 2005 onwards have an oil capacity of 6 quarts (5.7 liters) with the engine oil filter. The 5.7L engines have an oil capacity of 7 quarts (6.6 liters) with the engine oil filter. When To Change The Oil Of A Dodge Charger? American/Canadian-made Chargers built between 2005 - 2010 should have their oil changed every 6,000 miles (10,000 kilometers) or every 6 months, whichever comes first. When it's time to change the oil, the dashboard will display an 'oil change required' message every time the car is started. A single chime will accompany this message. Oil changes should happen within the next 500 miles (805 kilometers) of this message being displayed. Dodge Chargers built between 2010 - Present-day should have their oil changed every 10,000 miles (16,000 kilometers) or every 12 months, whichever comes first. When it's time to change the oil, the dashboard will display an 'oil change required' message every time the car is started. A single chime will accompany this message. Oil changes should happen within the next 500 miles (805 kilometers) of this message being displayed. For all Dodge Chargers (including the Hellcat) built between 2010 - Present-day, Dodge recommends that you change the oil every 4,000 miles (6,500 kilometers) if the car is driven in dusty or off-road conditions. Otherwise, follow the regular 10,000 miles recommendation. Your Charger may indicate that an oil change should happen as early as 3,500 miles depending on the driving circumstances. It's important not to ignore this message and follow the instructions of the car. Also read: Is The Dodge Charger A Sports Or Muscle Car? How To Check Oil Level Dodge Charger? Before checking the engine oil level, please make sure that the engine has been off for at least 15 minutes. Warm engine oil expands and will give you a false reading. Take the dipstick out off the oil reservoir and wipe it clean with a paper towel or cloth. The dipstick can be found on the left side of the engine (number 9 in the image below) and has the same location for all Dodge Chargers and engine types. Then, put the dipstick back in the oil reservoir and pull it out again. If the oil level falls below the cross-hatched area at the bottom of the dipstick, you must refill the oil reservoir with 1 quart of oil and repeat the measurement. Please make sure never to add more oil than the reservoir's maximum capacity (as stated in an earlier subheading). Overflowing the oil of the engine may cause serious damage to the engine and its components. Also read: What's The Difference Between A Charger Daytona And Scat Pack? How To Reset The 'Oil Change Required' Message? After every oil change, you must reset the oil life system. This way, the car can accurately measure the oil quality and how much is still in the reservoir. For instructions on how to do this, please see the video below. Also read: The Expected Mileage Of A Dodge Charger Sources The name Charger (war horse) appeared in the Dodge model line back in 1965 - this is how the then "charged" version of the compact 2-door coupe Dart was dubbed.Advertisement By the late 1960s, the Charger became a cult name: one of the famous muscle cars of the era. In the 2011 model year, the latest generation Charger appeared on the North American market, which was not officially represented in Europe and in our country. It's a shame: an interesting phenomenon among the full-size sports sedans. 2011 2012 2013 2014 2015 2016 2017 2018 2019 2020 2021 2022 Dodge Charger Oil Capacity Engine Oil Capacity (with filter) Oil Type 3.6L 6-cyl Engine ERB 5.9 quarts (5.6 liters) 5W-30 3.6L 6-cyl Engine ERB Flex 5.9 quarts (5.6 liters) 5W-30 5.7L 8-cyl Engine EZH 7 quarts (6.6 liters) 5W-20 5.7L 8-cyl Engine EZH 7 quarts (6.6 liters) 5W-20 5.7L 8-cyl Engine EZH 7 quarts (6.6 liters) 5W-20 6.2L 8-cyl Engine ESD 6 quarts (5.7 liters) 0W-40 6.4L 8-cyl Engine ESH 7 quarts (6.6 liters) 0W-40 6.4L 8-cyl Engine ESH 7 quarts (6.6 liters) 0W-40 6.4L 8-cyl Engine ESG 7 quarts (6.6 liters) 0W-40 2006 2007 2008 2009 2010 Dodge Charger Oil Capacity Engine Oil Capacity (with filter) Oil Type 2.7L 6-cyl Engine EER 6 quarts (5.7 liters) 5W-20 3.5L 6-cyl Engine EER 6 quarts (5.7 liters) 10W-30 5.7L 8-cyl Engine 7 quarts (6.6 liters) 5W-20 6.1L 8-cyl Engine 7 quarts (6.6 liters) 0W-40 1982 1983 1984 1985 1986 1987 Dodge Charger Oil Capacity Engine Oil Capacity (with filter) Oil Type 1.6L 4-cyl Engine ECA 3.5 quarts (3.3 liters) 5W-30, 5W-40, 10W-30, 10W-40, 10W-50, 15W-40, 20W-20, 20W-40, 20W-50, 30 2.2L 4-cyl Engine 4 quarts (3.8 quarts) 10W-30, 10W-40, 10W-50, 15W-40, 20W-20, 20W-40, 20W-50, 30 2.2L 4-cyl Engine Turbo 5.1 quarts (4.8 liters) 10W-30, 10W-40, 10W-50, 15W-40, 20W-20, 20W-40, 20W-50, 5W-30, 5W-40 How Much Oil Does a Dodge Charger Take? The 2021 Dodge Charger with the 6.4L 8-cyl engine (engine code ESG) takes 7 quarts (with filter) of 0W-40 synthetic oil. The Dodge Charger with a 5.7L 8-cyl engine (engine code EZH) takes 7 quarts (with filter) of 5W-20 synthetic oil. A new oil filter and a crush washer are required. The modern Charger is an exemplary badge engineering product. That is, it is a neatly redesigned Chrysler 300. Well, the approach is proven. Moreover, the "war horse" looks quite original. In press releases, the Charger is presented as a 4-door fastback coupe. The athletic Dodge does indeed feature an elegantly sloping roofline, as well as a false radiator with a distinctive telescopic crosshair and sculpted sidewall relief. A sports sedan ready for combat. And some think the Charger looks something like the hypothetical 4-door Nissan GT-R. The "Charger" has a long wheelbase, and the cabin is spacious: landing in the front and (three of us) in the 2nd row is quite free. Interior rear shoulder width 146.5 cm with unmeasured legroom. And yet, tall passengers in the back are not particularly comfortable: the ceiling is low because of the sloping roofline. The interior of the sports sedan is decorated at a "premium" level. Around first-class finishing materials: expensive plastics, fabric (in not the most expensive versions) seat upholstery of decent quality and attractive texture. The multifunctional sports steering wheel (with a cut-off lower segment) is adjustable in tilt angle and reach, and the front seats are adjustable not only longitudinally, but also in height. For those who understand, the Charger is of particular interest in the "charged" version of the SRT8 with the mighty "eight" Hemi 392 under the hood. American car reviewers drove the sports sedan around the range in just this version - on 245 / 45R20 Goodyear Eagle RS-A2 all-season tires. The acceleration dynamics are impressive: from a standstill, the massive test car picks up a speed of 96.5 km / h (60 miles) in just 4.3 seconds. Burns rubber under the inimitable roar of Hemi... And the standard distance of 1/4 mile (402 m) "warhorse" made in 12.9 seconds. and at the end of the measured segment reached a speed of 185.85 km / h. And the maximum speed of "Charger", according to tests, exceeds 280 km / h. link to DEXRON II Transmission Fluid Equivalent link to Best Spark Plugs For Ford Transit-150
